

Physiotherapy

Rene Jonkers

THERAPISTS ASSESS AND TREAT LEARNERS WHO:

- ✓ experience postural control difficulties that impact on their movement performance
- ✓ have congenital, neurological and neuromuscular conditions
- ✓ present with a delay in gross motor skills (e.g. balance, ball skills, etc.)
- ✓ display poor muscle strength, endurance and flexibility
- ✓ after an evaluation may require a referral to other medical specialists. This includes orthopaedic doctors, orthotists, etc.

**PHYSIOTHERAPY
AT TAFELBERG
SCHOOL**
